INTERNSHIP

Associate Intern – DESMOSLAB, Coimbatore, India *(August 2025 – July 2026)*

- Developed a cross-platform mobile application using Flutter, with Supabase for backend services, database management, authentication, and real-time data integration.
- Built and integrated application features with backend APIs, focusing on responsive UI, efficient data handling, and smooth user experience.
- Developed Loan Wise by implementing Machine Learning libraries to support intelligent, data-driven features within the application.
- Worked across the ML workflow, including data preprocessing, feature preparation, model integration, testing, and evaluation to improve application functionality.
- Collaborated on integrating AI/ML capabilities into production-oriented applications while maintaining performance, scalability, and usability.

CORE QUALIFICATIONS

- **Programming Languages:** Python, Java, JavaScript, Dart, SQL, HTML, CSS
- **App & Web Development:** Flutter, React.js
- **Machine Learning & Data Science:** Pandas, NumPy, Matplotlib, Scikit-learn
- **Backend Development:** FastAPI, REST APIs, Supabase
- **Version Control & Collaboration:** Git, GitHub, GitHub Desktop, Bitbucket
- **Open Source Tools:** Husky, Headroom, Ponytail, Graphify, Academic Guard
- **npm (npmjs):** Publishing and maintaining JavaScript libraries on the npm registry
- **AI Development Tools:** Gemini CLI, Claude AI, GitHub Copilot, Grok AI, Codex CLI
- **AI & Intelligent Applications:** LLMs, Prompt Engineering, AI Assistant Development, AI API Integration
- **Soft Skills:** Empathetic listener, Cooperative Spirit, Event Planner (trips/events), Professionalism, Resilience
- **Linguistic Skills:** English, Tamil, Hindi

EDUCATION

Bachelor of Engineering in Computer Science & Engineering (2022 – 2026) | **CGPA:** 8.66 /10
SNS College of Technology, Coimbatore, Tamilnadu, India

HSC (2021 – 2022) | **Percentage:** 84%
Dr. P.G.V Matric Higher Secondary School, Coimbatore, Tamilnadu, India

PROJECT

LoanWise — Loan Approval Prediction System (GitHub)
Built a full-stack loan approval prediction system that estimates a borrower's approval likelihood from their financial profile in real time. Trained a scikit-learn Random Forest pipeline (imputation, scaling, and one-hot encoding) on a 4,200+ record dataset, achieving 97.3% accuracy and a 0.998 ROC-AUC on the held-out test set. Developed a FastAPI backend with JWT authentication, role-based access, and prediction history (search, filter, pagination) over an async SQLAlchemy database. Designed a cross-platform Flutter mobile app with a guided multi-step form that delivers instant predictions, risk levels, and personalized recommendations to improve approval odds.

DevReel – Proof-of-work from your GitHub (GitHub) (Live Demo)
Built a full-stack web application that transforms GitHub repositories into recruiter-friendly portfolio pages with AI-generated project summaries, QR codes, and downloadable one-page PDFs. Developed the frontend using Next.js, React, TypeScript, Tailwind CSS, and the backend with FastAPI, Pydantic, and GitHub REST API integration. Implemented Google Gemini 2.5 with a rules-based fallback for intelligent project analysis and deployed the application on Vercel and Render with a PostgreSQL-ready architecture.

ACHIEVEMENTS & PARTICIPATION

- Microsoft Azure AI Certification
- NPTEL Certification – Privacy and Security in Online Social Media
- Runner-Up, Idea Presentation (QUANIX '23')
- PrepInsta Data Science Certification
- B.A. Hindi – Dakshin Bharat Hindi Prachar Sabha
- IELTS – Overall Band Score: 6.5
- Coding Contest Finalist (CIT 2024)
- Google AI Hackathon Participant
- Regional-Level Basketball Player
